

# Laminate Flooring

## Care and Maintenance.

### THE FIRST TIME

- Remove all dirt and dust with a soft brush or vacuum cleaner with a soft parquet brush.
- Clean the floor with a dry dust cloth.
- Replace the dust cloth and clean again.
- Remove any remaining dirt with a pH neutral recommended laminate cleaner (bona floor cleaner).
- Replace the dust cloth with a slightly damp cloth and clean again.
- If necessary, repeat the slightly damp cloth cleaning process.

### DAILY USE – DRY CLEANING

- Use a vacuum cleaner with a soft parquet brush or dry electrostatic dust cloths that attract dirt, dust, and hair like a magnet.
- Work the floor cleaner lengthways along the panels, in an overlapping zigzag motion and with long strokes across the floor.

### INTENSIVE USE – SLIGHTLY DAMP CLEANING

Wet cleaning is not recommended because it can damage your floor.

- Clean your laminate with a well wrung out cloth.
- Work the cloth lengthways along the panels, in a fluent zigzag motion across the floor, without applying pressure.
- Clean the surface thoroughly with a clean cloth (cotton/toweling) and remove any puddles immediately.

Stains from normal use, scuff marks from shoes, pencil marks and dirt stains are all easily removed without trace.

### WHAT TO DO IN CASE OF CAUSE>SOLUTION.

**Grease Stains:** May occur after cleaning as certain cleaning products can leave an oily residue (film) on the floor. We recommend mixing +/- 50 ml of mentholated spirits in a bucket of clean water (5-8L) and mop the laminate with a well-wrung cloth (see instructions for intensive use). In case of a persistent residue, this will have to be repeated several times.

**Rubber marks, scrapes or scuffs from heels, dirt, pencil or crayon marks:** use a dust cloth.

**Fruit, berries, milk, beer, wine, tea, soft drinks:** wipe off immediately with an absorbent cloth - or with a damp cloth if it has already dried in - and rub dry.

Blood, urine: remove immediately with a damp cloth and wipe off any remaining dirt with the recommended laminate cleaner.

**Nail polish, shoe polish, varnish, ink, make-up, felt pen:** remove with a drop of acetone on a clean cloth which you should apply on the stain only; follow the safety instructions that come with the product used.
