Performance

Peace & Quiet

ISOCORE Technology delivers industry leading acoustic performance.

Comfort

The expanded foam core and additional vinyl layer makes Premium Hush soft underfoot.

Durable & Waterproof

Lifetime durability and 100% waterproof surface make Premium Hush the ultimate choice for busy homes.

Meets E3 internal moisture building code requirements for wet areas.

Ultra-Fresh Protection

A universally recognised treatment applied to the underlayment and the ceramic top layer to inhibit the growth of mould and mildew - making your environment and home healthier.

Enhanced Ceramic Bead Overlay

Microscopic particles suspended in a urethane coating for superior wear and stain resistance. Treated with Ultra-fresh treatment to inhibit the growth of mould and mildew.

Clear Vinyl Wear Layer

0.55mm transparent vinyl wear layer provides protection against scratching, scuffs and marks even in high traffic and heavy use applications.

High Resolution Printed Decorative Film

High-resolution printed film delivers the effect and realism of natural timber with vivid clarity.

Solid Vinyl Layer

The vinyl layer facilitates authentic embossing to deliver a realistic timber effect, along with the durability that only LVT can provide.

ISOCORE Technology

ISOCORE Technology is a closed-cell foamed vinyl structural core that provides stability and durability while the expanded foam design contributes to minimising sound transfer.

Droplock 100 Installation System

Premium Hush end joints feature the Droplock 100 system for a drop-and-lock connection that increases installation speed and aligns the surfaces of adjoining planks.

Attached Underlay

Pre-attached underlay minimises both transmitted and reflected sound, is shock absorbent and provides warmth and comfort underfoot. Also treated with Ultra-fresh protection.
